Projects

Yay Lizzie

Technology Used: Ruby on Rails with MongoDB, Zurb Foundation

- A web application to allow people to leave notes, either of their own design or through Mad-Lib style suggestions in honor of a college graduation
- Uses three different types of notes and processes them into a single list after users register with Facebook

CTJ Madrichim

Technology Used: Ruby On Rails with MongoDB, HTML and CSS

- This site was created to be an internal document management system for the Madrichim Program at Congregation Tikvat Jacob.
- It processes the forms submitted by teens, teachers and administrators in order to better track teen development.

Track Yo' Gas

Technology Used: Ruby on Rails with PostgreSQL, HTML, CSS and Javascript

- A web application designed to be mobile first which tracks the miles per gallon of a user's car based on user inputs.
- Application graphs user's usage on homepage in order to show trends

ParDIY

Technology Used:

- A pair project with aims to unite people who like to plan Do-It-Yourself parties and allow others to find party ideas.
